Cum Laude BS Information Technology graduate with a major in Business Analytics, focused on building software that teams actually run. Combines full-stack development with practical data work — currently shipping an HR, payroll, and billing platform for two Singapore construction companies, after automating audit workflows and releasing a production mobile game. Comfortable moving between C#, Python, and JavaScript, and collaborating with non-engineering stakeholders to turn messy processes into clean, maintainable tools.

EDUCATION

Batangas State University — The NEU, JPLPC Malvar, Malvar, Batangas Aug 2022 — July 31, 2026
Bachelor of Science in Information Technology, Major in Business Analytics · Cum Laude

Laguna College of Business and Arts, Calamba City, Laguna Aug 2020 — 2022
Technical-Vocational-Livelihood — Information and Communications Technology

EXPERIENCE

LSN Engineering Pte. Ltd., Remote — Software Developer (Part-Time) Sept 2025 — Present

- Building the LSN System, a production HR and operations platform for two Singapore construction companies (LSN Engineering and Chang Sheng Contractors): employee records, daily time entry with overtime, leave, training, payroll, client billing, and foreign-worker levy files.
- Writing C# back-end logic and ASP.NET Core Razor Pages, with HTML, CSS, and JavaScript for staff-facing interfaces. Internal JSON and file handlers live on Razor routes rather than a separate public API.
- Designing PostgreSQL schemas and role-based access (site worker, office, admin) so both companies share one codebase with separate databases and branding.
- Delivering operational outputs, not just screens: Excel payroll and billing workbooks, PDF payslips, and audit-friendly activity logs.

Vantage Financial Corporation — Internal Audit Intern Feb 2026 — June 2026

- Learned the audit workflow on the floor first — branch transaction reviews, CCTV monitoring, and coordination with branch staff — then automated the slowest steps.
- Built Python pipelines in Google Colab (pandas, NumPy, OpenCV, EasyOCR, Pytesseract) to extract transaction data from images, PDFs, and Excel into structured tables for reviewers.
- Wrote Google Apps Script to flag cancelled transactions in Google Sheets, plus spreadsheet formulas that clean and move records so the team no longer copy-pastes by hand.

Nicolas Boucher Online, Remote — Video Editor (Freelance) July 2024 — Sept 2024

- Edited short-form and long-form videos on generative AI for finance and Excel shortcuts for Nicolas Boucher, owning the edit-to-export pipeline under a tight posting calendar — pacing, captions, and platform-specific exports.
- Worked directly with the creator on brand style and same-day revisions; tracked briefs, revision rounds, and delivery dates in Trello and Notion.

Capstone Project — Hack Slash: Development and Implementation of a Player-versus-Player Mobile 2024 — 2025
Collectible Card Game to Address Cybersecurity Threats with Analytics-Driven Design
Game Developer, DevOps & Game Designer

- Developed a PvP mobile collectible card game in Godot (GDScript) that models cybersecurity threats through analytics-driven card design. Firebase Realtime Database holds live match state, with REST-style APIs for profiles, decks, matchmaking, leaderboard, and card stats.
- Implemented Minimax AI for async/offline opponents that scale with rank, plus Google OAuth and transactional email for accounts. Owned gameplay, DevOps builds, and game design across the team.

LEADERSHIP & ACTIVITIES

Junior Philippine Computer Society — Video Editor, Media and Graphics Design 2024 — 2025

Seminars Attended

- Batangas Information Technology Conference 2024 — Navigating the Future of Technology: Integration, Innovation, and Security (Batangas Information Technology Society, Apr 2024)
- Malwareness: Fortifying Your Digital Fortress Against Cybersecurity Threats (JPCS — Malvar Chapter, Nov 2024)
- CICS Leadership Summit — Leading Today, Inspiring Tomorrow. Empowering Student Leaders for Innovation (CICS Student Council, Feb 2025)
- Batangas Information Technology Conference 2025 — Building a Connected Tomorrow. IoT Innovations and Beyond (Batangas Information Technology Society, Apr 2025)

CERTIFICATIONS

- Test of Practical Competency in IT (TOPCIT) — Level 2 (2026) | Certificate No. TL2506003656
- Cisco Certified Network Academy (2024)

SKILLS & INTERESTS

Programming & Frameworks: C#, ASP.NET, PHP, Python, JavaScript, HTML, CSS, GDScript
Databases & Tools: SQL, PostgreSQL, Firebase, Git, VS Code, Figma
Data & Analytics: Excel, Power BI, Google Colab, pandas, NumPy, OpenCV, EasyOCR
Digital Media: Photoshop, Premiere Pro, After Effects, Illustrator, CapCut, Canva
